

## AI AGENT CONSIDERATION

- since most of our leads come from tiktok some people will directly send the clip of the fish and ask is it available most likely it would be an old video - how to address this issue
- then second is when they do come in for the latest video offer - for these types we dont focus too much other then sending an account number with price- and also mention yes stock available until its not
- group chats should not be replied to or addressed
- sometimes during live times maybe 2 or 3 times a week or maybe 3-4 times a whole month, our format is the while we do live we ask for the customers to take screenshot of the item and send it to us for booking or payment as when we open live we have no space for negotiation and we offer fixed cheap prices - how to reply to this scenario
- how to reply to voice messages
- sometimes customers come and ask whats the cheapest arowana available or whats the promotion going on now - how to send them the latest tiktok video link.
